
a
Cell selection; n = 100
Distance from start (m)
Replacement cells
Random selection
Projection priority
Motor-control priority
b
Directional responses; n = 100
Right
Left
No graft
Original repair
Random wiring
Correct-type graft
Non-target graft
Response / intact
c
Shuffled identities; n = 100
Correct-type graft
Shuffled lost types
Non-target graft
Distance / intact
Replacement cells
d
Partner retention; n = 3
Replacement cells
Original partners retained (%)
Distance (m)
1.36 1.27 1.73 1.81 1.94
1.35 1.36 1.85 2.48 2.61
0.30 2.15 2.34 2.70 2.38
e
Graft survival; n = 3
Distance from start (m)
100 cells added
200 cells added
Cell survival probability (%)
f
Graft strength; n = 3
Distance from start (m)
100 cells
2,000 cells
Uniform
Moderate
High
Synaptic-strength variation
